## Attivo Investments Low-Cost Preservation Conservative Model Portfolio

The Attivo Investments Low-Cost Preservation Conservative portfolio is constructed using passive building blocks to provide market exposure at a low cost. While the portfolio is constructed with a low level of risk in mind, it will track the movements of markets both up and down. The portfolio is constructed with a low level of risk in mind. We aim for investment losses over a single year period to not exceed 10%, and the financial objective in mind is capital preservation.

## Goals-Based Investment Theory

The Attivo Investments range of Managed Portfolio Services utilise the theory of “goals-based investing”. This theory states that investment solutions should be tailored to an individuals’ personal financial goals. Typically, financial goals will fall into one of three categories:

- 1) Capital accumulation.
- 2) Capital preservation.
- 3) Income generation.

The Attivo Investments Low-Cost Preservation Conservative portfolio fits into the “capital preservation” category, and so all underlying holdings will look to mirror this approach. For example, a low risk preservation strategy, whilst holding a lot of fixed income exposure, would only hold short-dated, money market, or other near cash instruments – we will not look to speculate for growth by playing the yield curve, because this would not be consistent with the underlying client goals.

## Low Cost Investment Style

A market-tracking strategy is designed to, and will provide an exposure to core financial markets and will track movements in these markets **both** upwards and downwards. This approach simplifies the investment experience, prioritising simplicity and the potential for returns above the market average, in exchange for a broad market exposure and a return in line with the markets at large.

In building and maintaining solutions within our Low Cost family range we will use a “Fund of Funds” approach, looking to access the best terms possible based on the risk mandates we are providing.

It is important to note that whilst market-tracking has some advantages, it also has some drawbacks. For example:

This document is issued and approved by Attivo Investments in March 2025, which is authorised and regulated by the Financial Conduct Authority (**FRN 1012439**). The information and opinions contained in this document are intended for professional and intermediary clients only and are subject to change without notice.

The content is for informational purposes only and should not be construed as an offer or solicitation to buy or sell any investment or financial product. Investment values may fall as well as rise and you may get back less than you originally invested. This includes risks associated with emerging markets, overseas investments, and property or corporate bonds, which may exhibit higher volatility or reduced liquidity. Exchange rate fluctuations may also impact returns. Past performance is not a reliable indicator of future returns.

- a) As markets will be tracked all the way to the top and bottom in any given cycle, volatility is likely to be greater.
- b) There is no prospect of generating surplus performance above the index which is known as alpha.

Nonetheless, this sort of approach can add value for the right type of investor.

### Risk Levels

The level of risk taken will be consistent with “1 on a scale of 1 to 7”, as defined by our risk partners, Oxford Risk. The portfolio will always be managed in accordance with this risk level, and we have robust risk management processes in place to ensure the risk being taken does not exceed the agreed mandate.

On the 5 tier risk scale, this portfolio is consistent with “1 on a scale of 1 to 5”.

### Who is this Portfolio For?

The Attivo Investments Low-Cost Preservation Conservative portfolio might be suitable for the following types of investors:

- Clients prioritising **low costs** over enhanced downside protection, at a low level of risk.
- Those seeking efficient market exposure without the higher fees of active management, at a low level of risk.
- Clients prioritising **low costs** and broad market exposure, at a low level of risk.
- Those comfortable with limited active intervention, at a low level of risk.
- Clients looking to preserve wealth, at a low level of risk.
- Clients who have limited capacity for loss.
- Clients who are not comfortable with large fluctuations in the value of their invested capital.

The content is for informational purposes only and should not be construed as an offer or solicitation to buy or sell any investment or financial product. Investment values may fall as well as rise and you may get back less than you originally invested. This includes risks associated with emerging markets, overseas investments, and property or corporate bonds, which may exhibit higher volatility or reduced liquidity. Exchange rate fluctuations may also impact returns. Past performance is not a reliable indicator of future returns.

## Asset Allocation

Equities	Fixed Income				Liquidity	Inflation Sensitive
Global Equity Fund	Global Bond Index Fund	High Yield Bond Index Fund	Emerging Markets Government Bond Index Fund	Global Short Term Bond Fund	Money Market Fund	U.K. Index-Linked Fixed Interest Fund
8.5%	25%	1.25%	2.5%	39.75%	19.25%	3.75%
Legal & General	Vanguard	Legal & General	Legal & General	SEI	Royal London	SEI

The standard asset allocations are reviewed periodically, based on a range of capital market assumptions, and we routinely run stress-testing, based on several historical and theoretical negative market outcomes.

We rebalance our portfolios on an annual basis only. We have undertaken thorough research on this topic which concluded more frequent rebalancing adds a lot in the way of cost, but not in the way of return or risk control.

## Performance

The graphs below show the long-term performance of this strategy against the IA Mixed Investment 0-35% sector, our chosen benchmark for the Attivo Investments Low Cost Preservation Conservative portfolio. Whilst this performance is simulated to some extent, the strategies invested have been present for the duration of the timeframe. As the portfolios we manage are goal-based, the strategies for each will have been consistent for the duration of the period analysed.

01/04/2020 - 31/03/2025 Data from FE fundinfo 2025

Investment values may fall as well as rise and you may get back less than you originally invested. This includes risks associated with emerging markets, overseas investments, and property or corporate bonds, which may exhibit higher volatility or reduced liquidity. Exchange rate fluctuations may also impact returns. Past performance is not a reliable indicator of future returns.

## Charges

There are no initial charges for investing into the Attivo Investments Low Cost Preservation Conservative portfolio, aside from any dealing charges which may be imposed by the chosen platform.

The ongoing cost of the portfolio is 0.25% a year, which includes the fund charges and the DFM charges combined. SEI Investments, our co-CIO, are also remunerated within this 0.25% charge. Any transaction charges would be additional to this. Please see the latest costs and charges document on the resource centre for transaction charges.

## Resources

For additional information on these strategies please refer to our website – [attivoinvestments.co.uk](https://attivoinvestments.co.uk)

Our website also has a Resource Centre, which provides other collateral and tools to assist you.

Our portfolios are available for use on FE Analytics, by visiting the “portfolios” section of the interface, then searching for “Attivo Investments”.

## Other Advantages of using Attivo Investments

In addition to the information above, there are other important benefits of using the Attivo Investments range of solutions.

- Our co-CIO arrangement with SEI Investments opens up new doors when compared to the UK Managed Portfolio Solution (MPS) space at large. A typical MPS provider in the UK will have access to around 4,000 different funds. The Attivo Investments solutions have access to around 100,000 different strategies.
- Whilst the Low Cost range of solutions uses a fund of funds approach, our Core and Apex solutions use a manager or managers approach. Rather than buying their funds we award them mandates, and replicate their portfolios within our own range of themed funds.
- This approach allows us to access niche areas of the market, including strategies which do not sit within a fund structure.
- By pooling resources with SEI Investments, we are not only able to access these strategies that many others cannot, but are also able to do so on preferential terms. The average mandate size for a client of SEI Investments is £1bn and, therefore, managers are clearly incentivised to offer the best possible terms, allowing us to better deliver positive outcomes for your clients.
